

## MONTHLY REPORT OF RIVER AND FLOOD CONDITIONS

REPORT FOR:

MONTH

October

YEAR

1999

SIGNATURE

Gregory K. Waller

In Charge of HSA

DATE

November 9, 1999

TO: Hydrometeorological Information Center, W/OH2  
 NOAA / National Weather Service  
 1325 East West Highway, Room 7230  
 Silver Spring, MD 20910-3283

*When no flooding occurs, include miscellaneous river conditions, such as significant rises, record low stages, ice conditions, snow cover, droughts, and hydrologic products issued (WSOM E-41).*

☒ No flood stages were reached in this HSA for the month above.

October was another dry month across West Central Texas. No river flooding occurred during the month. One widespread rainfall event associated with a strong cold front occurred on October 30<sup>th</sup>, with all of the HSA receiving measurable rainfall. The heaviest rainfall amounts occurred over the Big Country and the Heartland as some areas received amounts between 1 and 1 ½ inches. Other rainfall events on the 17<sup>th</sup> and the 19<sup>th</sup> brought only scattered amounts of 1/4 to ½ inch to the Big Country, the Northern Edwards Plateau and the Northwest Hill Country.

For the month of October, San Angelo Received 0.94 inches of rainfall, which is 1.46 inches below normal. San Angelo remains well below normal for the year so far, with 13.43 inches since January 1<sup>st</sup> (5.15 inches below normal). Due to the ongoing drought, the City of San Angelo has continued voluntary water conservation programs for the city. Abilene received 1.66 inches of rain for the month of October, which is 0.85 inches below normal. For the year so far, Abilene has received 16.32 inches of rain, which is 5.57 inches below normal.

Reservoir levels continue to drop across the HSA and the soil moisture is dry, so the threat of flooding remains low.

## Area Monthly Rainfall Totals

Acton Ranch	0.56
Albany	1.54
Anson	0.88
Ballinger	0.79
Brady	1.68
Coleman	1.34
Eldorado	0.95
Fort McKavett	1.66
Junction	2.35
Lake Abilene	1.86

## River Products Issued
